Emergency services

First aider

First aid box

Shower

Eye wash

Wash affected area

Boot wash

First aid details:

After significant accidental inhalation: Remove casualty from exposure ensuring one's own safety whilst doing so. If there is any difficulty in breathing, or vomiting has occurred obtain medical attention urgently.

After contact with eyes: Do not rub eyes, as additional cornea damage is possible by mechanical stress. Remove any contact lenses and open the eyelid(s) widely to flush eye(s) immediately by thoroughly rinsing with plenty of clean water for at least 15 minutes. Contact a specialist of occupational medicine or an eye specialist.

After skin contact: Wash copiously with water for at least 15 minutes - remove contaminated clothing, including shoes and launder before re-use. If skin irritation develops seek immediate medical attention.

If swallowed: Wash out mouth with water. Do not induce vomiting and obtain medical attention urgently.

Spillage and environmental:

Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

Mobility: Store in an upright position and ensure container is tightly closed. Keep away from sources of ignition.

Accidental release: Water: insoluble. Spreads over the surface of water and will slowly evaporate and biodegrade slowly. Non-toxic to aquatic organisms. Soil: Small volumes released on land would be absorbed in the upper layers and be biodegraded.
