Is the substance hazardous to health when:

Breathed in Swallowed In contact with skin In contact with eyes Other. Please specify

Health risks: May cause skin and respiratory irritation and chemical burns to eyes.
Skin contact: There may be mild irritation at the site of contact.
Eye contact: There may be irritation, redness and risk of chemical burns. The eyes may water profusely.
Ingestion: There may be soreness and redness of the mouth and throat. There may be stomach discomfort.
Inhalation: There may be respiratory irritation.

First aid and emergency measures:

Emergency services

First aider

First aid box

Shower

Eye wash

Wash affected area

Boot wash

First aid details:

After significant accidental inhalation: Remove casualty from exposure ensuring one's own safety whilst doing so.
After contact with eyes: Do not rub eyes, as additional cornea damage is possible by mechanical stress. Remove any contact lenses and open the eyelid(s) widely to flush eye(s) immediately by thoroughly rinsing with plenty of clean water for at least 15 minutes. If possible, use isotonic water (0.9% NaCl). Contact a specialist of occupational medicine or an eye specialist.
After skin contact: Wash the affected skin with soap and water. Seek medical treatment in all cases of irritation.
After significant accidental ingestion: Wash out mouth with water. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe.

Spillage and environmental:

Mobility: Store in cool, well-ventilated area. Keep container tightly closed.

Accidental release: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Scrape up material and clean residue with hand wipes, place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.

Water

Carbon Dioxide

Dry powder

Foam

Fire blanket

Raise alarm

Fire details:

Product is non-flammable and compatible with water, foam, carbon dioxide and dry powder extinguishers. Suitable extinguishing media for the surrounding fire should be used.

Decomposition products may include the following materials:

Carbon dioxide, carbon monoxide, nitrogen oxides and halogenated compounds.

No specific fire or explosion hazard.

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
